Hi Shaun

Here are a couple of items we may raise; we don't expect a definitive response Wednesday. Just a heads up.

Tom

Subject: Discussion Points with Shawn McGrath

1. Nutrient General Variances (Boulder Permit). He already knows the details.
2. EPA approval of our EC/SAR WQ Standards from the court-ordered remand. EPA has not yet approved the EC & SAR WQ Standards for the Tribe. If they approve the Tribe's WQS at the same time they approve ours, we do not have a plan on how to meet their more stringent WQ standards. It would be nice to have this dialogue before they approve anything.
